

BHARAT YATRA

A CULTURAL EXPERIENCE PLANNER

INTRODUCTION

Core Objective

BharatYatra empowers travelers to craft personalized, culturally immersive itineraries while overcoming logistical and cultural barriers through local guide connections, language assistance, and etiquette tips. It's also tailored for foreigners visiting India, with scalability to other destinations.

Target Audience

Foreign travelers (solo, families, groups) seeking authentic cultural experiences in India, aged 18-45, tech-savvy, and curious about art, food, history, festivals, or spirituality.

PROBLEM STATEMENT

Our app opens the door to a vibrant world of cultural treasures, sparking curiosity and encouraging users to explore iconic destinations in person. It's a journey to reconnect with heritage, designed for those eager to rediscover their roots and newcomers ready to embrace timeless traditions.

Target Audience

Our app is a gateway to the vibrant world of Max and Max cultural treasures, crafted to ignite curiosity and inspire users to explore these iconic destinations firsthand. It's more than just an experience—it's a journey to reconnect with our heritage, tailored for those yearning to rediscover their roots and newcomers eager to embrace our traditions.

OUR SOLUTION OVERVIEW

A smart travel app blending culture, tech, and personalization

Key Features:

- Personalized itineraries via recommendation AI
- AR for real-time exploration
- Language translator & cultural learning tools
- Recommendation model based on interest
- Monument Detection using ML models
- Location-Based Insights
- Customizable Travel Packages
- Multimodal Language Translator
- QR Monument Scanner
- Interactive Culture Page
- Local guide integration
- Voice Chatbot
- Cultural Learning Features
- Profile & Social Integration

MAIN FLOW OF THE APP

OTHER IMPORTANT FEATURES

USER ONBOARDING

- Registration: Create an account with credentials
- Login: Secure access to personalized features
- Interest Quiz: 5 questions to gauge cultural preferences
- Recommendation Engine: Suggests tailored cities based on quiz

HOMEPAGE & PACKAGE SELECTION

- Inputs: From/To cities, trip duration, guests, budget
- Output: Curated packages matching user interests
- Customization:
 - Activities, hotels, transport, places to visit
 - Adjustable based on trip days

The screenshot displays the Bharat Yatra mobile application interface. At the top, a blue header bar contains the app name 'Bharat Yatra' and navigation icons. Below the header is a promotional banner with the text 'Discover Your Dream' over a scenic image of a traditional Chinese building. The main section is titled 'Plan Your Trip' and includes several input fields: 'From' (Goa), 'To' (Chennai), and a date selector (27 Mar 2025). Under the 'Travellers' section, there are controls for 'Adults' (1) and 'Children' (0). A 'Budget Range' slider is set between ₹5000 and ₹20000. A prominent blue button labeled 'Search Packages' is located at the bottom of the form. The bottom navigation bar features icons for Home, a play button, a plus sign, a chat bubble, and a user profile.

SOLO INTEGRATION

How the Custom Itinerary Works

- **User Input:** The user specifies:
 - Destination (city or region)
 - Trip duration (number of days)
 - Interests (e.g., "I love local cuisine and historical sites")
- **AI Processing:** The AI analyzes these inputs, cross-referencing them with a database of cultural activities, landmarks, dining options, and events in the chosen destination. It prioritizes options that match the user's quiz responses and stated preferences.
- **Output:** A detailed day-by-day itinerary is generated, including:
 - Suggested activities (e.g., a cooking class for foodies or a temple tour for history buffs)
 - Timings and locations
 - Integration with AR previews (e.g., see the site in real-time)
 - Local guide recommendations for specific activities
